

# Student Parliament Core Operations and Governance Framework

## 1. Internal Accountability Protocols

### 1.1 Objective Grounds for Removal

To maintain professional boundaries and eliminate personal friction or emotional bias within the council, a member of the Student Parliament may only be considered for formal removal if they meet one or more of the following strictly verifiable criteria:

- **Attendance Forfeiture:** Accumulating three (3) consecutive unexcused absences from mandatory parliament sessions, planning committees, or official school events without presenting a verified written medical or academic excuse to the Secretary prior to the event.
- **Neglection of Assigned Duty:** Demonstrating a documented failure to execute assigned operational tasks, event deliverables, or portfolio responsibilities on two (2) distinct occasions within a single academic term.
- **Code of Conduct Violations:** Engaging in behavior that explicitly violates general school regulations, academic integrity standards, or any actions that fundamentally bring public disrepute to the reputation of the Student Parliament.

### 1.2 Step-by-Step Dismissal Procedure

When an internal accountability trigger is breached, the parliament must execute the following protocol without exception:

1. **Evidence Compilation:** The Secretary compiles a formal record of the infractions (e.g., timestamped attendance logs, missed project deadlines, or official disciplinary notices).
2. **The Private Intervention Warning:** The Parliament President and the Faculty Advisor hold a private, closed-door meeting with the member in question. The member is issued a formal, written warning detailing the performance gap and granted a strict seven (7) calendar-day grace period to rectify their behavior or operational output.
3. **The Parliament Floor Vote:** If no measurable improvement occurs after the seven-day grace period, the impeachment motion is placed on the agenda for the next scheduled parliament session. To prevent peer pressure or intimidation, the member is asked to step out, and a **two-thirds (2/3) absolute majority vote via secret ballot** is required to finalize the removal.
4. **Immediate Asset and Access Forfeiture:** Upon a successful removal vote, the individual is stripped of their title and given exactly 48 hours to transfer all digital passwords, central shared drive access, physical event keys, and pending project documentation directly to the Secretary.

### 1.3 Voluntary Resignation Protocol

When a member chooses to step down voluntarily, the process must focus on minimizing structural downtime and preventing project stagnation through a professional offboarding routine:

1. **Formal Notice Submission:** The resigning member must submit a formal written notice via email or the official communication platform to the President and Faculty Advisor. To ensure operational continuity, a mandatory notice period of **7 to 10 calendar days** must be served; immediate walkouts or sudden departures are strictly prohibited.
2. **The Exit Project Briefing:** Within 48 hours of notice submission, the President or Secretary will conduct a mandatory exit briefing with the member to accurately map out the live status, vendor contacts, and pending milestones of all active initiatives under their portfolio.
3. **Comprehensive Handover Delivery:** Before the final day of the notice period, the departing member must upload all digital assets, event blueprints, contact directories, and outstanding files to the central Parliament Shared Drive, finalizing a clean break.

## 1.4 Succession and Vacancy Transition Plan

To ensure the remaining council members are not overwhelmed with a sudden backlog of work, a vacant seat must be filled within seven (7) calendar days according to a strict, non-negotiable hierarchy of succession:

| Priority Level               | Succession Pathway                   | Operational Mechanism                                                                                                                                                                                                                      |
|------------------------------|--------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Priority 1: Immediate</b> | Automatic Promotion of Shadow/Deputy | If the vacant portfolio utilizes an active, pre-established Junior or Shadow role (e.g., Deputy Events Head), that individual automatically steps up and assumes the primary title. No voting or external search is permitted.             |
| <b>Priority 2: Secondary</b> | Internal Realignment                 | If no deputy position exists for that portfolio, the vacancy is opened exclusively to current general parliament members. Interested internal candidates present a 2-minute pitch at the next session, followed by a simple majority vote. |

|                                     |                              |                                                                                                                                                                                                                                                               |
|-------------------------------------|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Priority 3:<br/>Final Resort</b> | External Faculty Appointment | If no internal council members apply or qualify for the open role, the Executive Board (President and VP) will nominate an external student from the general student body, subject to a rigorous background review and final approval by the Faculty Advisor. |
|-------------------------------------|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### **The 3-Day Handover Constraint Rule**

Once a new member is successfully placed via the succession hierarchy, they must undergo a mandatory 3-day onboarding period shadowing the Secretary (or the outgoing member, if amicable). During their first full week of taking office, the newly appointed member is strictly prohibited from introducing new initiatives or altering existing project workflows; their sole mandate is the flawless execution of the pre-existing roadmap left by their predecessor.

## **2. External Pipelines: Grievances and Initiatives**

### **2.1 The Digital Anonymous Report System**

To provide a secure, safe environment for the student body to report severe institutional grievances—specifically inappropriate staff behavior, verbal abuse, harassment, or targeted academic retaliation—the parliament operates a fully digital, untraceable pipeline designed to eliminate the fear of student backlash.

#### **2.1.1 Infrastructure Configuration**

The anonymous pipeline relies entirely on a **Digital Lockbox via Google Forms**. The form must be strictly configured to **not** collect email addresses, track Google sign-ins, or harvest user metadata. Physical suggestion boxes are entirely excluded from this framework to prevent unauthorized access, document theft, or physical tampering.

#### **2.1.2 The "Shield" Triage and Escalation Process**

Individual parliament members are strictly barred from handling raw complaint data alone to protect the integrity of the system. The pipeline enforces a rigid chain of custody:

1. **The Triage Filter:** Access to the raw digital submission spreadsheet is restricted exclusively to the Parliament President and the Faculty Advisor.
2. **The Anti-Vexatious Screening:** The Triage Committee immediately reviews and filters out petty, non-actionable complaints (e.g., complaints regarding a teacher's general strictness, normal homework loads, or everyday grading disputes). Vexatious or malicious submissions targeting staff members are permanently destroyed.
3. **The Redaction Stage:** For valid, severe behavioral or safety grievances, the Triage Committee manually strips away all accidental identifying details, including student names, roll numbers, specific class sections, or temporal references that could compromise the reporter's identity.

4. **Formal Institutional Escalation:** The fully redacted case file—consisting solely of objective facts, direct evidence, and timelines—is compiled into an official document and presented directly to the School Principal and top management by the Faculty Advisor. The original unredacted digital entry is erased to ensure absolute student protection.

## 2.2 Non-Parliament Member Proposal and Policy Procedure

To foster a truly democratic campus culture, regular students (non-parliament members) must be provided a formal mechanism to pitch new student-led events, clubs, campus facilities, or policy reforms. This pipeline prevents chaotic, ad-hoc hallway demands and organizes requests through a systematic lifecycle.

### 2.2.1 The Submission Portal and the 20-Signature Rule

Non-parliament members wishing to propose a structural change or campus event must submit a formal **Student Initiative Proposal** through the central idea portal. To filter out low-effort or individual complaints, the portal enforces the **20-Signature Rule**: the proposer must explicitly list the validated names and roll numbers of at least twenty (20) peer students who formally back the initiative. The form requires clear answers for:

- The core institutional need or campus problem being addressed.
- The specific, actionable solution (event format, club structure, or policy shift) being proposed.

### 2.2.2 The Lifecycle of a Student-Led Proposal

1. **PR and Secretary Review:** Submissions are pulled weekly by the Public Relations team and the Secretary to verify compliance and confirm the 20 signatures. Proposals that violate core school codes, are completely logistically impossible, or lack the required peer backing are immediately issued a polite, automated rejection text detailing the missing criteria.
2. **The 3-Minute Floor Pitch:** Passed proposals earn the student proposer a formal invitation to the opening 10 minutes of the next official Parliament meeting. The student is granted exactly three (3) minutes to pitch their operational vision directly to the council.
3. **The Council Debate and Vote:** Following the presentation, the external student departs, and the parliament conducts a structured debate regarding budget constraints, calendar availability, and student body demand. A simple majority vote from the council is required to adopt the motion.
4. **Co-Managed Operational Execution:** Upon passing the vote, the proposal is officially adopted as an active Parliament Project. The parliament pairs the external student with a relevant internal portfolio head (e.g., Head of Events or Head of Technology) who acts as their internal sponsor, co-drafting the final administrative clearance sheet for the principal's signature.
