

# Student Parliament: Topic Briefing Guide (2026)

---

This guide provides essential briefing points for a student parliament in India, focusing on current affairs and active policy debates as of July 2026.

## 1. The Delimitation & Representation Debate

**Context:** The Delimitation Bill, 2026 and 131st Constitution Amendment Bill are currently in Parliament.

**The Debate:** Proposing to increase Lok Sabha seats to 850. The central conflict is balancing population-based representation (2011 census) with the rights of states that managed population growth, and the shift in power between Lok Sabha and Rajya Sabha.

## 2. Women's Reservation & Constitutional Amendments

**Context:** The Constitution (106th Amendment) Act, 2023 was notified on April 16, 2026.

**The Debate:** With the law now in force but implementation deferred, the debate centers on accelerating the timeline, the "rotation of seats" policy, and linking reservations to specific census outcomes.

## 3. Artificial Intelligence (AI) Governance & Ethics

**Context:** The New Delhi Declaration on AI Impact (Feb 2026) focuses on "Sarvajan Hitaya".

**The Debate:** Balancing rapid innovation with data privacy and job security. Key questions include whether the government should mandate open-source models or enforce strict licensing.

## 4. Climate Change & Green Economy Transition

**Context:** India met its 50% non-fossil capacity target, but coal remains essential for 75% of power.

**The Debate:** Launching a domestic carbon market. The conflict: Is it fair to phase out coal when energy demand is at an all-time high due to heatwaves?

## 5. Digital Public Infrastructure (DPI) & Privacy

**Context:** Digital India turns 11 in July 2026; platforms like UPI are now global models.

**The Debate:** Exporting the DPI model vs. protecting citizens from state surveillance and data breaches as the government digitizes health and judicial records.

## 6. Educational Reforms (NEP Implementation)

**Context:** 2026 AISHE data shows inconsistent implementation of 4-year undergraduate programs.

**The Debate:** The gap between university degrees and industry readiness. Should the government mandate strict timelines for universities, or does this threaten academic autonomy?

## 7. Global Multi-alignment & Geopolitics

**Context:** Pursuing "Strategic Realism" and the EU-India Security and Defence Partnership.

**The Debate:** Maintaining India's role as a "Vishwa Mitra" (Global Friend) while navigating the intensifying US-China rivalry.

## 8. Economic Growth vs. Social Welfare

**Context:** 6.6% GDP growth forecast, but concerns remain regarding "jobless growth" in the informal sector.

**The Debate:** Prioritizing market reforms to boost GDP vs. increasing expenditure on social safety nets to address youth unemployment.
